Company Overview of ChemAid Laboratories, Inc.

ChemAid Laboratories, established in 1971, is a leading formulating Contract Manufacturer of beauty products located just outside of New York City, with significant exposure and relationships on the West Coast and throughout the country. ChemAid Labs routinely formulates products to be globally compliant for a largely globally distributed brand base. ChemAid Labs' specialty is the formulation and high quality manufacturing and filling of high performance, efficacious and high quality hair care, skin care, body treatment and fine fragrance ancillary products for prestige and specialty brands. ChemAid Labs is a certified and / or approved formulating Contract Manufacturer to a broad range of Marketers, from global Fortune 500 Companies to entrepreneurial and emerging brands. ChemAid Labs is a true collaborative Supplier partner with significant experience and ongoing dedication to formulating texturally and aesthetically compelling beauty products into which highly efficacious specialty ingredients are incorporated for highly performing products. ChemAid Labs partners with Clients in the recommendation of new concepts, compelling ingredient technology, product positioning, line extensions and other areas of Marketing support that are value added versus traditional Contract Manufacturers. Quality is the leading thread throughout the organization, from formulations to manufacturing / filling and dedicated and interactive Customer service. In summary, ChemAid Labs is uniquely positioned as a Contract Manufacturer offering world-class formulas, many of which are regarded as "best in class" and many of which have garnered industry and / or beauty Editor acclaim over the years.
